DETAILED ACTION

This action is in response to papers filed on July 20, 2005.

Claims 1, 5-6, 8, 12, 14-19, 27 and 31 have been cancelled.

Claims 2-4, 7, 9-10, 20-25, 28-30, 32 and 37 have been amended.

Claims 2-4, 7, 9-11, 13, 20-26, 28-30, 32 and 34-47 are pending.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 2-4, 7, 9-11, 13, 20-26, 28-30 and 32 drawn to a method of tracking a mail piece, classified in class 705, subclass 1.

II. Claims 34-47, drawn to a method of user sessions taking place to perform tasks such as bill payment and online catalog ordering in which a postage label is determined and printed, classified in class 705, subclass 33 and 34. The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because one can still perform the user session of paying a bill online or purchasing an item online without having to track the delivery status of a mail piece. The subcombination has separate utility such as the

Art Unit: 3629

user does not have to have purchased the mail piece in order to track a particular mail piece.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. It is further noted that if applicant chooses Group I as the elected group they must further elect a species within the group as designated below.

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Species A- tracking the delivery status of a mail piece.
- b. Species B- tracing information related to the transaction of a package that is being delivered.
- c. Species C –tracing information with regard to the contents of a package to be delivered.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 2, 28 and 29 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Traci L. Smith whose telephone number is 572-272-6809. The examiner can normally be reached on Monday-Thursday 6:00 am-4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on 571-272-6812. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
